1/ Inventories at end quarter. Quarter-to-quarter change calculated from this table is not the current-dollar change in business inventories (CBI) component of GDP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2/ Inventories of construction establishments are included in "other" nonfarm inventories.

3/ Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and general government and includes a small amount of final sales by farms.

Note: The industry classification of inventories is on an establishment basis and is based on the 1987 Standard Industrial-Classification (SIC) beginning 1987 and on the 1972 SIC for earlier years shown.

1/ Because of independent seasonal adjustment of the various series, detail will not add to total.

2/ Data for 1967 by reason for unemployment are not strictly comparable with those for later years and the total by reason is not equal to total unemployment.

Note: Data relate to person 16 years of age and over. See footnote 6 and Note, Table B-30.

1/ Rate on new issues within period; bank-discount basis

2/ Yields on the more actively traded issues adjusted to constant maturities by the Treasury Department.

3/ Effective rate (in the primary market) on conventional mortgages, reflecting fees and charges as well as contract rate and assuming, on average, repayment at end of 10 years. Rates beginning January 1973 not strictly comparable with prior rates.

4/ Bank discount basis; prior to November 1979, data are for 4-6 months paper.

5/ For monthly data, high and low for the period. Prime rate for 1929-33 and 1947-48 are ranges of the rate in effect during the period.

6/ Since July 19, 1975, the daily effective rate is an average of the rates on a given day weighted by the volume of transactions at those rates. Prior to that date, the daily effective rate was the rate considered most representative of the day's transactions, usually the one at which most transactions occurred.

7/ From October 30, 1942 to April 24, 1946, a preferential rate of 0.50 percent was in effect for advances secured by Government securities maturing in 1 year or less.

1/ Farm output measures the annual volume of net farm production available for eventual human use through sales from farms or consumption in farm households.

2/ Gross production.

3/ Includes items not included in groups shown.

4/ Survey-based labor productivity time series; not comparable with data published in the issues of the Economic Report of the President prior to January 1989.

5/ Computed from variable weights for individual crops produced each year.

1/ Department of Defense shipments of grant-in-aid military supplies and equipment under the Military Assistance program are excluded from total exports through 1985 and included beginning in 1986.

2/ Includes undocumented exports to Canada through 1988. Beginning 1989, undocumented exports to Canada are included in the appropriate end-use category.

3/ Total arrivals of imported goods other than intransit shipments.

4/ C.I.F. (cost, insurance, and freight) import value at first port of entry into the United States. data for 1967-73 are estimates.

5/ F.a.s. (free alongside ship) value basis at U.S. port of exportation for exports and at foreign port of exportation for imports.

6/ Total includes revisions not reflected in detail.

7/ Total exports are on a revised statistical month basis; end-use categories are on a statistical month basis.

Note: Data are as reported by the Bureau of the Census adjusted to include silver ore and bullion reported separately prior to 1969. Trade in gold is included beginning in 1974. Export statistics cover all merchandise shipped from the U.S. customs area, except supplies for the U.S. Armed Forces. Exports include shipments under Agency for International Development and Food for Peace programs as well as other private relief shipments.

1/ Former West Germany

2/ Civilian unemployment rates, approximating U.S. concepts. Quarterly data for France, Germany, and United Kingdom should be viewed as less precise indicators of unemployment under U.S. concepts than the annual data. Many Italians reported as unemployed did not actively seek work in the past 30 days, and they have been excluded from comparability with U.S. concepts. Inclusion of such persons would about double the unemployment rate for Italy through 1985, and increase it to 11-12 percent for 1986 forward.

3/ There are breaks in the series for Germany (1983) and Italy (1990 and 1991). Based on the prior series, the rate for Germany was 7.4 percent in 1983 and the rate for Italy was 6.3 percent in 1986. Based on the new series beginning in 1991, the rate for Italy for 1990 would be approximately 7.3 percent.

4/ Hourly compensation in manufacturing, U.S. dollar basis. Data relate to all employed persons (wage and salary earners and the self-employed) in the United States and Canada, and to all employees (wage and salary earners) in the other countries. For France and United Kingdom, compensation adjusted to include changes in employment taxes that are not compensation to employees, but are labor costs to employers.
